### Dayton Audio Elite Series Speakers

#### Audiophile sound for less!

- You demand price and performance, Dayton Audio's Elite Series delivers!
- Designed by renowned industry engineers
- Paintable frames and mesh grills allows for blending with any decor
- Installation professionals can count on superior sound and solid performance
- Mounting systems allow for fast and easy installation

Choose the Dayton Audio Elite Series for well-engineered, high performance architectural audio in-wall and ceiling speakers! The Elite Series from Dayton Audio offers selection, sound and features normally found on higher priced lines. Engineered with accurate quasi-open-slope electrical filters and high power voice coils, the Elite Series provides a smooth, wide frequency response to below the 60Hz range. When quality and sound experience merge with affordability, you've found the Elite Series from Dayton Audio.

### ES80W 8" 2-Way In-Wall Speaker Pair

- Amazing performance-to-price ratio
- Quick, defined bass
- Hand tuned crossovers
- Easy to install

Quality components, flat frequency response, and maximum bass are the hallmarks of the Dayton Elite ES80Ws. The 8" multi-polymer woofer features the speed of a lightweight cone for lightning-quick low frequency output. A meticulously mated 1" soft dome tweeter will amaze you with its sound. Discover what you've been missing. Building the 1" soft dome tweeter into a swivel design allows you to tweak the soundstage to your heart's content. Installation is kept simple with integrated screw-foot pull downs built into the speaker's frame.

**Specifications:** • Woofer: 8" multi-polymer • Tweeter: 1" swivel silk soft dome • Power handling: 60 watts RMS/125 watts max • Impedance: 8 ohms • Frequency response: 48-20,000 Hz • Dimensions: 14-1/8" H x 10" W • Cutout: 12-3/4" W x 8-11/16" W • Sold in pairs.

### ES65W 6-1/2" 2-Way In-Wall Speaker Pairs

- Phenomenal sound at an affordable price
- Perfect for home theater and other sound applications
- Ideally suited for use as front channel or rear surround speakers
- Deep, rich sound and stellar highs from audiophile quality components
- Small footprint, high-output speakers

With so many choices in the area of in-wall speakers it's easy to overlook the features and design elements that set apart speakers like these Dayton Elite Series in-walls. Quality components and design by industry "golden ears" combine to make these in-walls the perfect choice for any surround sound application. The multi-polymer coned woofers deliver deep resonating lows while the 1" swiveling tweeters directionally spread HF where you need it. Single unit paintable frames with screw-foot pull down allow for a quick 5 minute installation.

**Specifications:** • Woofer: 6-1/2" multi-polymer • Tweeter: 1" swivel silk soft dome tweeter • Power handling: 40 watts RMS/80 watts max • Impedance: 8 ohms • Frequency response: 55-20,000 Hz • Dimensions: 12" H x 8-1/2" W • Cutout: 10-1/4" H x 7-1/4" • Sold in pairs.

### ES65CS 6-1/2" and ES80CS 8" Stereo Ceiling Speakers

- Place both channels of sound in a single location
- Ideal for adding stereo sound and fill to difficult placement areas
- Engineered for long life and performance
- Dayton Audio solid construction and reliability
- Kapton voice coils and poly-carb neo driven tweeters

Ever find yourself in need of having to place sound in an area that is just too small for a conventional set of stereo speakers to be installed? These Dayton Audio Elite stereo ceiling speakers are the answer to just that. Once installed, you'll have stereo sound from a single location! Each speaker contains a multi-polymer cone woofer and dual neo-driven polycarb tweeters. Single unit paintable frames with screw-foot pull down allow for a quick 5 minute installation. Available in two popular sizes.

**ES65CS:** • Woofer: 6-1/2" multi-polymer • Tweeter: Dual 1" swivel neo-driven polycarbonate • Power handling: 40 watts RMS/80 watts max • Impedance: 8 ohms • Frequency response: 55-20,000 Hz • Dimensions: 8-1/2" dia. • Cutout: 7-3/8" dia. • Sold individually.

**ES80CS:** • Woofer: 8" multi-polymer • Tweeter: Dual 1" swivel neo-driven polycarbonate • Power handling: 60 watts RMS/120 watts max • Impedance: 8 ohms • Frequency response: 48-20,000 Hz • Dimensions: 9-7/8" dia. • Cutout: 8-3/4" dia. • Sold individually.
