Speakers

Roy Allison's pioneering research on room acoustics in the 1970s has enshrined him as an industry legend today. His ground-breaking theories still provide the basis for the techniques used to calibrate and correct the acoustic aberrations in today's elite custom installations. Roy is still an active member of the Allison engineering team.

AL8IW 8" 2-Way In-Wall Speaker Pair

- Legendary Allison engineered sound
- 8" co-polymer cone woofer with rubber surround
- 1" swiveling silk dome tweeter
- Accurate audio reproduction

Every Allison Acoustics speaker is a precise combination of quality components and construction. The AL8IW 8" 2-way in-wall from Allison performs at a price and quality level that's sure to please.

Though small in size, these in-walls can provide you with performance-hall ambience and are perfect for home theaters or for distributing sound throughout a living environment. Solid performance is delivered from the quality 8" co-polymer cone woofer, which has been mated with a pivoting 1" silk dome tweeter. The Allison precision crossovers use audiophile-grade components for years of use and a lifetime of sound. Paintable grills to match any decor. Complete with an easy DIY installation.

Specifications: • Power range: 10-175 watts • Impedance: 8 ohms • Frequency response: 32-22,000 Hz • Dimensions: 14-1/8" H x 10" W • Cutout: 12-3/4" W x 8-11/16" W • Mfg. #AL8IW • Sold in pairs.

AL6ICS 6-1/2" and AL8ICS 8" Stereo Ceiling Speakers

- High performance speakers placing both channels of sound in one location
- Legendary Allison Acoustics engineering and audiophile quality
- Engineered for long life and performance
- Kapton voice coil and bumped back-plates
- Poly-switch protection network

Combines both channels of audio into one location well as replacing a conventional pair of stereo speakers and providing a cost efficient solution. Stereo ceiling speakers are ideal to use in order to place both channels of sound in areas that aren't physically capable of having two separate speakers such as hallways, foyers, and bathrooms. Each speaker contains a co-polymer cone woofer and two high performance polycarb tweeters that work together to deliver full bass and ozone reaching highs. Single unit frame construction and screw-foot pull-down makes for an easy installation; weather resistant for indoor or outdoor use.

AL6ICS: • Woofer: 6-1/2" co-polymer • Tweeters: Dual 1" swivel polycarbonate • Power range: 10-150 watts • Impedance: 8 ohms • Frequency response: 35-22,000 Hz • Dimensions: 8-1/2" dia. • Cutout: 7-3/8" dia. • Mfg. #AL6ICS • Sold individually.

AL8ICS: • Woofer: 8" co-polymer • Tweeters: Dual 1" swivel polycarbonate • Power range: 10-175 watts • Impedance: 8 ohms • Frequency response: 32-22,000 Hz • Dimensions: 9-7/8" dia. • Cutout: 8-3/4" dia. • Mfg. #AL8ICS • Sold individually.
