

The world's first commercial FM stereo broadcast employed Sherwood technology. Sherwood was the first to introduce digital readout tuners and computer-controlled tuners. And, most significantly, the industry's first 100% all-silicon solid-state audio receiver came from Sherwood.

Today the company's leadership continues. Not only is the Sherwood brand synonymous with high performance audio worldwide, but it is an industry secret that Sherwood is the actual manufacturer of nearly one-third of the world's high performance receivers. Many of the products built are available with brand names which may be better known, but none are built with the same sense of pride as those that bear Sherwood's name.

### Sherwood RX-4105 Stereo Receiver

- 200 watts of stereo power
- Ultra low total harmonic distortion (THD) of 0.08%
- Digital Quartz PLL tuner
- Totally Discrete Amplifier Stage (TDAS)

**Specifications:** • Power output: 2 x 100 watts (20-20,000 Hz, 0.08% THD @ 8 ohms) • Dimensions: 17-3/8" W x 4-7/8" H x 14" D.

**#252-125** ..... \$149.95 LIST **\$89.99** EACH

### Sherwood RD-7502 7.1 Home Theater Receiver
