Tripp Lite Isobar Surge Suppression

The world's best selling and most advanced surge suppressors; Isobar units feature exclusive isolated filter banks that eliminate interference between connected equipment. Isobar's multiple component circuitry of MOVs, toroidal chokes, and VHF capacitors provides instantaneous surge suppression of up to 36,000 amp spikes (960 joules of energy absorption.) Unique Cascade Circuitry allows you to choose the level of RFI/EMI noise filtering each piece of equipment demands. Every isobar features an all-metal housing to take the abuse plastic surge suppressors can't. All models carry up to \$25,000 Ultimate Lifetime Insurance against surge related damage for the Isobar and connected equipment.
