Rayovac Photo & Electronics Batteries

Never Miss a Moment with Rayovac Photo Batteries!

- Long-lasting quality for less cost
- The dependable Rayovac brand
- Guaranteed performance
- Powerful solutions for film and digital cameras!

Life is a series of special moments. Though we can't make them last, photos allow us to relive them again and again. A baby's first steps. Your daughter's high school graduation. Weddings, anniversaries, birthdays, vacations. These times are too special to miss capturing because of a dead camera battery. Keep plenty of Rayovac Photo batteries on hand and never miss another moment. Rayovac photo batteries give long lasting performance through all your clicks, flashes and zooms...and for less cost than other higher-priced brands.

Rayovac NiMH Rechargeable Batteries

- Last 3 times longer than standard alkaline in digital cameras
- Can be charged up to 1,000 times
- No "memory" problems—recharges anytime, even if partially drained
- NiMH is safe for the environment and can be disposed of with regular trash

Rayovac's high-capacity NiMH batteries are the perfect power solution for demanding high-drain devices. They last up to three times longer than standard alkaline batteries in digital cameras and can be recharged up to 1,000 times. Today's demanding high-tech devices demand Rayovac rechargeable NiMH!

Rayovac I-C³ 15-Minute NiMH Rechargeable Batteries

Rayovac's patent-pending I-C³ technology (In-Cell Charge Control) puts the control of the recharging into the battery, instead of the charger. This Nickel Metal Hydride (NiMH) technology offers fast, safe, reliable charging. For use with Rayovac PS5 and PS6 chargers.

Why Buy I-C³:

- Unsurpassed charging time—15 minutes or less
- Lasts up to 4 times longer than standard alkaline
- Can be recharged up to 1,000 times
- Very inexpensive compared to the hundreds of disposable alkaline batteries
- Safe design—system monitors the charge in each individual battery

Rayovac I-C³ 15-Minute Battery Chargers

- Incredible power—up to 4x longer than alkaline in your digital camera and great in all your high-tech devices
- Incredible speed—I-C³ batteries charge in 15 minutes...No other battery recharging system is faster
- Incredible savings—up to 1,000 charges per battery
- Charges 2 (PS5) or 4 (PS6) AA or AAA NiMH I-C³ batteries in 15 minutes

These chargers for Rayovac's patent pending I-C³ batteries fully charge AA or AAA I-C³ NiMH batteries in an unsurpassed charging time—15 minutes or less! Also charges regular rechargeable NiMH batteries overnight. The PS5 charges 2 AA or AAA and includes 2 AA I-C³ and 2 AAA I-C³ NiMH batteries. UL Listed. One-year manufacturer's warranty.

- #140-150 (PS5 2-Position) **\$24.94** (1-2) **\$23.30** (3-UP)
- #140-152 (PS6 4-Position) **\$38.97** EACH **\$35.55** (2-UP)

Charges Rayovac I-C³ Batteries in 15 Minutes!

Rayovac Keyless Entry & Electronics Batteries

More and more cars today are equipped with a keyless remote feature. Many of us wonder how we lived without it. Keep your keyless remote functioning properly by replacing the battery frequently with Rayovac. Also ideal for watches, calculators, talking books, games, remote controls, computers, and medical devices like glucometers. The CR models are 3V lithium and the 23A is a 12V alkaline. Sold individually.
