

For over 70 years Pioneer has embodied the passion and desire for quality audio and video

products. At Pioneer, the slogan "Move the Heart and Touch the Soul," represents their mission to stir as many senses and emotions as they can through the wonders of technology.

NEW

Pioneer VSX-518-K 5.1 Home Theater Receiver

- Pioneer Hybrid Amplifier Technology 120W x 5 (1 kHz, 0.05 % THD @ 8 ohms)
- Freescale® DSP
- 192 kHz/24-bit DAC
- Built-in DTS® 96/24, Dolby® Digital, Dolby® Pro Logic II decoders
- Remote control included

Year after year Pioneer receivers set the standard by which home theater receivers are measured. The VSX-518 delivers 120 watts of low distortion power to five speaker channels for movie theater sound quality in the convenience of your home. DTS® 96/24, Dolby® Digital, and Dolby® Pro Logic II decoders create surround sound audio impact. Additionally, an MP3 player audio input jack is featured on the front panel for quick, easy connection to iPods or MP3 players. Three high definition component video inputs have been built-in for simple source switching, as has provisions for both coaxial digital audio and Toslink optical digital audio. Five analog stereo audio inputs are included for connecting all of your audio gear. Remote control included.

Pioneer VSX-918-B 5.1 Home Theater Receiver

- Pioneer Hybrid Amplifier Technology 120 Watts x 5 (1 kHz, 0.05% THD @ 8 ohms)
- Freescale® DSP, 192 kHz 24-bit DAC, and XM® Surround Sound Powered by Neural Audio®
- Auto MCACC Room Calibration with 5-band EQ
- Lip Sync audio/video synchronization and Phase Control bass management
- HDMI A/V repeater (2 inputs, 1 output with signal repeater) and front panel USB input

Pioneer's VSX-918 features Hybrid Amplifier Technology, a Freescale Processing 180 MIPS DSP, a 192 kHz 24-bit DAC, and HDMI switching with signal repeating. 120 watts of raw, unadulterated power (1 kHz, 0.05 % THD @ 8 ohms) is sent to five speaker channel outputs. 3.5 mm stereo audio and USB jacks are front mounted for direct connection to MP3 players and iPods. Connect your XM® and Sirius® satellite radios and control them over the On Screen Display (satellite tuners and subscription required; sold separately). Connections for both Toslink optical and coaxial digital audio are provided for flexibility, as are three high definition component video inputs and 5.1-channel preamp inputs. Remote control included.

Pioneer DV-410V Upscaling DVD Player with HDMI

- Upscales DVDs to 1080p
- HDMI output for digital audio and video
- 108 MHz/12-bit video DAC and 96 kHz/24-bit audio DAC
- Compatible with all versions of DivX® video
- USB input for compressed video playback

Rising above lower quality players, the new Pioneer DV-410V is outfitted with industry-leading video features and engineering to be your source of choice. A 108 MHz/12-bit video DAC and 96 kHz/24-bit audio DAC to deliver smooth, sharp reproduction with a high resolution 1080p picture that looks great on new LCD and plasma HDTVs. To fulfill the dynamic movie viewing experience of home audiences, this DVD player takes advantage of Pioneer's PureCinema™ 2:3 Progressive Scan technology. This eliminates troublesome image artifacts like jagged edges or excessive film judder.

Pioneer VSX-1018AH-K 7.1 Home Theater Receiver

- DTS-HD® and Dolby® TrueHD decoding
- Advanced MCACC and Symmetric EQ
- Advanced Direct Energy Power Amplifier with 7 x 130W power output
- Full HDMI audio/video decoding, control, and repeating function built-in
- Faroudja 1080p scaler

Pioneer built the VSX-1018AH to exploit the benefits of Blu-ray technology, while remaining affordable. HDMI audio decoding has been added as has support for the DTS-HD® and Dolby® TrueHD formats present on Blu-ray discs. HDTV owners will love the inclusion of the highly sought-after Faroudja scaler that upconverts composite, S-video, and component video to a pristine 1080p resolution. iPod® users can directly connect to the VSX-1018AH using the Digital Direct via USB connection. Advanced MCACC with 9-band EQ and Symmetric EQ with standing wave control take measurements captured by the included microphone to optimize sound for the unique speaker location and acoustics of any room.
