

### Sanus Speaker Stands

Most wood speaker stands are low budget, low performance designs, constructed of particle board, plywood, or low grade hardwoods. Sanus Systems Basic Foundations are the first MDF speaker supports to combine great aesthetics and stability, with high performance at a reasonable price. Twin contoured pillars aligned in a "V" configuration support speakers in style, offer superior rigidity, and provide for our Speaker Cable Management System. A snap-in curved black cover holds cables in place and hides them from both front and back view. Force-fit floor spikes further minimize resonance and provide stability in carpeting. Sanus' special triangular isolation pads are placed on the top plate for speaker protection and acoustic isolation. Black ash finish. Proudly made in the USA. Sold in pairs.

### Sanus Satellite Speaker Stands

- Perfect for "cube" speakers
- Concealed wire path
- Adjustable height
- Support speakers up to 4 lbs.

The HTB satellite stands are perfect for today's popular "theater-in-a-box" surround sound system speakers. A stable designer base provides secure placement on any surface and the height is adjustable for optimum listening level. Includes top plate, "L" brackets, and a QuickMount™ adapter for speakers with keyholes on the back. Sold in pairs.
