

Cool Components HiFlo Vent System

The HiFlo vent system is perfect for circulating air in a room or closet.

Package includes: • Vent system w/dual fans and grills (white grills)
• One temperature controller

• One power extension cable • One universal transformer (300 mA). Available with two white grills, two black grills, or one white, and one black grill.

- #305-260** (1 white/1 black grill)
#305-265 (2 black grills)
#305-270 (2 white grills) \$285.00 LIST **\$220.00** EACH

Cool Components Cabinet Toe Kick Vent System

This system draws cooler air into a cabinet from the toe kick. The package includes • One 3" cabinet vent (black)
• One vent grill (black) measuring 2-5/8" x 17-1/2"

• One universal transformer (300 mA).

- #305-275** \$195.00 LIST **\$95.00** EACH

Cool Components Cabinet Vent Package 1: Basic System

- Efficient and attractive solution
- Includes everything required to vent an enclosure
- Great for concealed projectors
- Self-contained, no messy tubing
- Reversible airflow

The cabinet vent package is a great product for any equipment rack. The vent has a 2.1 mm coax power connector to match the other Cool Components products and runs from 7-12V DC. This package includes: • Two cabinet vents 3" • One universal transformer (300 mA) • One Y-adapter power cable w/power plug.

- #305-245** (Black)
#305-250 (White) \$160.00 LIST **\$120.00** EACH

Cool Components Cabinet Vent

- Quiet and efficient operation
- Circulates air in a cabinet or enclosure
- Quick and easy installation
- Necessary for any equipment rack

Specifications: • Enclosure: PVC • Fan: reversible brushless levitation fan with a special bearing system • Air flow: 10.2 CFM max • Noise: ~22 dB max • Power connection: 2.1 mm jack (center pin positive) • Voltage: 7 to 12 VDC • Current: 40 mA max • Power consumption: .5W max • Dimensions: 3-5/8" W x 3-5/8" H x 2-5/8" D.

- #305-235** (Black)
#305-240 (White) \$70.00 LIST **\$58.00** EACH

Cool Components Temperature Controller

This high-tech, microprocessor controlled unit senses the temperature around components and controls fan speed based on that temperature. This unit is easily installed in-line between the power supply and cooling units. Monitoring and controlling the fans optimizes the functionality of the cooling system.

- #305-285** \$92.00 LIST **\$75.00** EACH

Home Audio / Video

Electronics

COOL COMPONENTS
INCORPORATED

Cool Components manufactures top-quality cooling and ventilation products for audio and video systems. These products have been designed to protect equipment and systems from the heat that is naturally generated by such devices. This includes amplifiers, stereo receivers, cable and satellite receivers (especially high-definition receivers), video projectors, game boxes, etc. Cool Components' fan units help protect individual equipment, cabinets, and even entire closets and rooms.

Cool Components Cooling Fan Units

- Necessary for equipment racks
- Quiet, efficient, affordable cooling
- Quick and easy installation
- Low profile design allows placement in tight areas

Each fan unit uses the PS-500 power supply #305-305. Sold separately.

Single fan specifications: • Air flow: 4 CFM max • Noise: ~20 dB max • Power consumption: .5W max • Dimensions: 5-1/8" W x 1" H x 4" D.

Dual fan specifications: • Air flow: 8 CFM max • Noise: ~28 dB max • Power consumption: 1W max • Dimensions: 6-1/4" W x 1" H x 4" D.

Part #	Mfg. #	Description	List Price	Price Each
305-200	CP-SF	Standard single fan unit	\$85.00	\$55.00
305-205	CP-SF-HV	High velocity single fan unit	85.00	69.50
305-210	CP-DF	Standard dual fan unit	115.00	95.50
305-215	CP-DF-HV	High velocity dual fan unit	115.00	95.50
305-305	PS-500	Universal power supply	29.00	18.00

Cool Components Cooling Package 1: Basic System

- Silent operation
- Affordable cooling system
- Simple to install
- Necessary for any equipment rack

The PK-CPI-BSC basic cooling package provides everything you need to keep your system cool.

The package includes: • One single-fan cooling unit • One dual-fan cooling unit • One universal transformer (300 mA) • Power Y-adapter cable.

- #305-220** \$225.00 LIST **\$165.00** EACH

Cool Components High-Voltage Thermostat

The TC-HV-100 thermostat turns fans on and off based on temperature. It is perfect for the ventilation products that are designed to vent air out of cabinets and rooms. This unit installs in minutes and plugs into a standard outlet. Mount it inside a closet or cabinet to have greater control over the cooling system.

- #305-290** \$72.00 LIST **\$60.00** EACH
