RX-5502 Multi-Room Stereo Receiver **NEW**

- Complete two zone control • Twin Discrete Amplifier Stage (TDAS)
- Distributed audio made easy

The RX-5502 is designed to provide complete stereo receiver control and amplification to two "zones" at the same time. You can now listen to your favorite albums, CDs, or DVDs—while the ball game is on the radio in another room. Four dedicated speaker outputs ensure a straightforward connect-and-forget system that brings audio into four separate rooms. Dual TDAS® Discrete Amp Stage amplifiers drive two pairs of stereo speakers (each in parallel) and ensure reliable sound quality that most whole house audio amplifiers fail to deliver. 400 watts of genuine power lets you crank the volume without running out of headroom. Four analog stereo inputs, one phono input, and one analog stereo output.

Features and Specifications: • Power output per amplifier section: 2 x 100 watts (20-20,000 Hz, 0.7% THD @ 8 ohms) • Input impedance: 47k ohms • Analog stereo inputs: 4 • 1 analog audio output • AM/FM tuner • Dual zone remote control • Bass/treble controls • 1/4" Headphone jack • Dimensions: 5-9/16" H x 17-3/8" W x 14-1/2" D.
