

UXGA Runners

- Color-code yellow: compatible with yellow and green break-aways
- Connectors include a protective pulling cap capable of 30 pounds of pulling tension
- Three-28 AWG coaxial cables with braided copper shielding, three-24 AWG twisted pair plus a single 24 AWG pair
- Supports resolutions up to 1600 x 1200
- CL-2 rated for in-wall installations

The PC Runner is the ideal solution for in-wall installations that support computer based applications. Whether hanging a projector in a modern 21st century classroom or installing a commercial digital signage system, a clean, crisp signal can be ensured.

Digital High-Speed Runner Cables

- Color-code red: compatible with red break-aways
- Will support HDMI high-speed specifications
- Connectors include a protective pulling cap capable of 30 pounds of pulling tension
- Four 24 AWG shielded twisted pairs with drain wire, one 24 AWG twisted pair, five 24 AWG conductors
- Mylar® foil shield and tinned copper braid overall
- Supports HDMI and DVI-D high resolution video
- CL-2 rated for in-wall installations

The Digital Runner is the ideal solution for in-wall installations. Whether hanging a flat-panel TV in a home or installing a commercial digital signage system, a crisp, clean signal can be counted on—every time.

98015 Coupling Rings for RapidRun™ Runners

Two coupling rings are provided with every PC (yellow) and multimedia (blue) RapidRun Runner cable for connecting the break-away termination. This replacement two-pack is available for the times when those rings are lost or misplaced.

#183-839 \$4.95 EACH

Digital Break-Aways

- Color-code red: compatible with red Break-Aways
- Will support HDMI high-speed specifications
- Passive devices for connections less than 35 ft.
- Active devices for connections of 50 ft. or longer
- Supports HDMI and DVI-D high resolution video
- CL-2 rated for in-wall installations

The passive digital Break-Away is desired when the connection from the source device to the display is 35 ft. or less. The active Break-Away is desired when the connection from the source device to the display is greater than 50 ft. Compatible with HDMI high-speed signals, this system will provide a crisp, clean signal up to 1080p and can be counted on every time.

42223 Digital HDMI Voltage Inserter

At times, a source device (cable box, DVD player, video game system) will not have enough output power from the HDMI bus. The ensuing voltage drop across the HDMI cable will create video problems like sparkle, color loss or complete video loss. The RapidRun Digital HDMI Voltage Inserter solves this problem by isolating the power from the source device and providing a dedicated power source that ensures the crisp, clean signal that is expected from high definition equipment. The HDMI Voltage Inserter is connected directly to the source device through the HDMI output and the HDMI cable will connect to the Voltage Inserter.

USB SuperBooster

- Extends the functional distance of a USB signal, allowing a USB device to function with a USB-enabled computer up to 150 ft. away
- Bus-powered so no external power source is required
- Uses standard Cat 5e or Cat 6 patch cords (not included), allowing for easy use and flexibility

Conquer USB length limitations and place your USB devices where you want them with the USB SuperBoosters from Cables To Go. These solutions extend the distance of a USB device to a host computer up to 150 ft. so you can place your USB projector, camera, printer, or any other USB device exactly where you want it. The USB SuperBooster is powerful yet simple, with no drivers to install or special software required; they are compatible with any computer that supports USB.
