

Whether preparing a meal for your family or hosting a holiday party with friends, spice up the atmosphere with a BreatheAudio whole home audio system. Simple installation, high-fidelity amplifiers, and easy-to-operate system controls combine for a breathtaking experience.

BreatheAudio Elevate 2-Source Multizone Stereo Systems

- Affordable whole home audio that's easy to install
- Independent multi-zone operation
- High-fidelity 30W per channel amplifiers

BreatheAudio's Elevate™ whole home audio systems prove that distributed audio need not be expensive to own or complicated to install and operate. Each zone operates independent of the other zones, meaning you can listen to your favorite CD in the kitchen while the radio plays a baseball game in the office or den. Each system includes everything you need to get started (speakers, speaker wire, and category cable sold separately). One-touch control allows you to power a zone (or the whole system) on and off, or choose volume and sources. Built-in to each keypad is an infrared target that enables remote control of connected components. Black, white, ivory, and white trim plates for the keypads are included, as is a remote control, and two IR emitters.

The Elevate™ 2.2 system includes a two-source, two-zone amplifier that delivers 30 watts of high-fidelity power to each zone and two keypads.

The Elevate™ 2.4 system includes a two-source, four-zone amplifier that delivers thirty watts of high-fidelity power to each zone and four keypads.

#301-100 (Elevate 2.2 system)	\$649.00 LIST	\$398.46 EACH

#301-106 (Elevate system w/4 pairs of 8" ceiling speakers)	\$1,158.99 LIST	\$649.52 EACH

BreatheAudio Elevate 6-Source 6-Zone Stereo System

- Plug-and-play setup for easy installation
- Six independent zones of hi-fi audio
- High fidelity 40W, 12-channel amplifier
- Keypads included with white, black, almond, and ivory trim plates

BreatheAudio's Elevate™ 6.6 whole home audio systems prove that distributed audio need not be expensive to own or complicated to install and operate. Each zone operates independent of the other zones, meaning you can listen to your favorite CD in the kitchen while the radio plays a baseball game in the office. Each system includes everything you need to get started (speakers, speaker wire, and category cable sold separately).

The Elevate™ 6.6 system includes a six-source, six-zone amplifier that delivers 40 watts of high-fidelity power to each zone and six keypads that combine effortless control with undeniable style. One-touch keypad control allows you to power a zone (or the whole system) on and off, or choose volume and sources. Built-in to each keypad is an infrared target that enables remote control of connected components. Black, white, ivory, and white trim plates for the keypads are included, as is a remote control, and six IR emitters.

For homes and applications where more zones are required, BreatheAudio offers an additional six zones of amplification and control in the Elevate™ 6.6 expansion system.

#301-114 (System w/6 pairs of 8" ceiling speakers)	\$2,138.94 LIST	\$1,198.00 EACH

BreatheAudio BA-200 Pulse 200W Auxiliary Amplifier

- 100W of low distortion, high impact power provided to two channels
- Useful as a stand alone amplifier or with BreatheAudio's elevate systems
- Stable down to 4 ohms stereo
- Half-rack design leaves room for other audio components on the shelf

BreatheAudio's Pulse audio amplifier delivers remarkably clean, robust sound to even the largest areas around your home at a very attainable price. 100 watts of clean, rich sound is delivered to two channels with features typically found in much more expensive and complex audio amplifiers. The compact half-rack layout is designed to fit side by side with the BreatheAudio Elevate Audio Distribution System, keeping the rack clean and open for additional home audio components.

Pulse connects to the audio outputs available on most audio source equipment and offers you the flexibility of dynamic power control. By implementing the control input/output feature, the audio amplifier is triggered to power on and off by an external voltage of 3-30 volts, either AC or DC. This feature is ideal when used in conjunction with whole-house audio systems, such as the BreatheAudio Elevate, equipped with control output capable of supplying the necessary voltage trigger.

- Specifications:**
- Output power: 100W x 2 RMS (into 4 ohms @ 0.08% THD)
 - Frequency response: 20-20,000 Hz (±1 dB)
 - Input impedance: 22k ohms
 - Dimensions: 3.75" H x 8.5" W x 13.5" L.
