

**A1260 Aria Multi-Zone Audio Amplifier**

- 12-channel amplifier (17" component style)
- 60 watts per channel with full load on all channels
- Each zone may be switched between the global input and the local input
- Sources connected to global input can be heard in all 6 zones
- Independent audio sensed turn-on circuit
- Toroidal power transformer with four secondaries to maximize separation

Designed in the USA, the A1260 is a 12 channel/6 zone amp that delivers 60 watts per channel with full loads on each channel. Each zone can switch between either a global input or a local input; the global input is sent to all 6 zones. The A1260 offers plenty of power, clean sound, and reliable performance to satisfy the most discerning audio and home theater enthusiasts.

**A0127 Aria 4-Source Volume Control**

- Designed to control the A4601
- 3-conductor 22-28 AWG or Cat 5 cabling
- Illuminated status and IR feedback indicators
- Single-gang box installation
- IR receiver compatible w/signals from 30-60 kHz
- Available in white and ivory/almond finishes
- Removable speaker cable connector for easy wiring installation
- RJ-45 or screw terminal connections for easy installation

The A0127 modular keypads are designed to be used with the Aria multi-room A/V matrix system. They feature simple installation by way of the RJ45 or screw terminals. The speaker connectors are removable for easy wiring. An illuminated status and IR indicator keeps you informed of the ongoing status of the Aria system. A built in IR receiver and transmitter allow individual source control and the keypad commands can be taught to a learning remote. Available in white or ivory/almond.

**Aria A/V Distribution System Kit with Speakers**

- Whole-house audio in one box
- 4-source 6-output A/V matrix controller
- 12-channel 60 watt amplifier
- Six keypads
- Six pairs of 6" ceiling speakers

The Channel Vision Aria A-Kit 2 provides everything you need for a distributed audio system. The kit includes: One A4601 4-in/6-out matrix A/V controller • One A1260 12-channel amplifier • Six A0127 keypads • Six pairs IC602 6-1/2" ceiling speakers.

**AB-313 iBus Docking Station for the iPod**

- Add an iPod® dock to any A-BUS® system
- Single gang design
- Slide-out design hides when not in use

The Channel Vision AB-313 provides a single gang in-room iPod® input for A-BUS® audio systems. A slide-out dock extends for easy dock-and-rock connectivity, and retracts flush to the wall when not in use. Built-in IR control is compatible with Channel Vision's A0501 and A0502, and Apple's remote control. Both power and signal are transferred over Cat 5 cable and are connected (input and output) via RJ45 jacks or 110 punchdown terminals.

**Compatible with:** • iPod video • iPod nano • iPod photo • iPod mini • 4th Gen iPod with omni dock connector • 3rd Gen iPod with omni dock connector (does not charge).

**#183-237** ..... \$209.99 LIST **\$138.60** EACH

**P-1014 1-Source 4-Zone A-BUS Distribution Module**

- 1 x 4 A-BUS distribution module
- RJ45 & 110 punch down connectors
- Local and system audio inputs with selectable priority
- Expansion to additional units

The P-1014 functions as the heart of your A-BUS system. It is a 1 x 4 distribution module that delivers power and audio signals to 4 amplified keypads (AB-114). Four IR emitter outputs allow IR signals detected by the AB-114 to control source devices such as CD players and AM/FM tuners. RJ45 and 110 punch down connectors are provided for easy setup and installation. Other P-1014 modules can be added to expand your A-BUS system.

**#183-214** ..... \$274.70 LIST **\$183.14** EACH

**AB-202 1-Source A-BUS Distribution Module**

- Single source distribution module
- Single Cat 5 output for audio distribution
- Single source input
- Four IR emitter outputs and routing for control of external equipment
- Status and IR feedback indicators

The AB-202 is a single source distribution module which makes up the "heart" of the A-BUS system. It accepts a single audio source and converts it to Cat 5 for use with the Channel Vision four zone distribution module. It has four IR emitter outputs for control of external equipment.

**#183-216** ..... \$162.23 LIST **\$108.15** EACH

**AB-404 1-Source 4-Zone A-BUS Distribution Module**

- Panel distribution module
- Accepts source from AB-202 and distributes to four zones
- Provides power, status and IR distribution to all locations
- Output connector for system expansion

The AB-404 is a four zone distribution module for use with the Channel Vision AB-202 single source distribution module. The AB-404 inserts power to all zones for the volume controls. It can mount in a structured wire panel or screw to a wall.

**#183-218** ..... \$108.15 LIST **\$72.10** EACH

**AB-124 A-BUS Volume Control**

- Audio amplification to in-room speakers
- IR receiver for control of external equipment
- Operable via remote control or local push-button
- Single gang box with faceplate installation

The AB-114 amplified keypad is a volume control, amplifier, and IR receiver all in one. It is able to power one pair of speakers, controls that zone volume, and relays IR information back to the source equipment. The AB-114 can be mounted in a single gang cut-in ring or deep J-box (if required by code). It is compatible with Decora wall plates. Blue LEDs show volume level and the keypad completely mutes when bottom LED is off. Available in White.

**#183-222** ..... \$214.15 LIST **\$142.75** EACH

**AB-902 1-Source 4-Zone A-BUS Kit**

- A-BUS audio distribution kit
- Single source, four zones
- Built-in IR control
- Volume controls included
- Universal remote

The AB-902 A-BUS system distributes audio to every room of your house over ordinary Cat 5 wire. The entire system is powered from one location for ease in wiring. Each pair of speakers is controlled from a local wall plate amplifier. Volume can be controlled manually from the local volume control or by an IR remote control. IR signals are also routed back to the source components so you can change FM stations, or pause your CD player. White wall plates included. The kit includes: • Four AB-114 keypads • One AB-202 single source distribution module • One AB-404 panel distribution module w/power • Two IR-3002 dual emitters • One AB-500 universal remote • One J-110 punchdown tool • One AB-T2454 24V power supply.
