

Triplett Line-Bug

- Tests standard telephone jacks and LAN jacks
- Has both RJ11 and RJ45 style plugs
- Tests single line, 2 line, 3 line, or 4 line jacks to USOC (telephone) standard
- Compact design—fits in shirt pocket
- Self powered—no batteries required
- Economical and convenient
- One year limited warranty

Features a tri-color (Red/Green/Amber) alert to indicate current polarity, and ringing/AC voltage.

Quality and Technology for Tomorrow

Triplett Plug-Bug

The Plug-Bug is a GFCI receptacle tester. It detects common wiring problems in standard and GFI outlets. To test an outlet, simply plug the tester into the outlet and read the test lights. A test button helps to determine correct operation of a GFI receptacle. One year limited warranty.

#391-150 **\$5.87** EACH

Triplett Sniff-It 2 AC Voltage Detector

- Detects AC voltage without making contact
- Sensitivity from 5 to 600 Volts AC
- Flashes & beeps faster as AC voltage is approached
- Economical and pocket-sized
- Powered by one A23 battery (included)
- Five year limited warranty

#391-148 **\$14.35** EACH

Triplett WireMaster Coax Mapping Kit

- Real-time test helps identify intermittent connections
- Identify any pair of wires (shielded or unshielded)
- 8 remotes with BNC connectors included
- Tests for opens and shorts
- AC/DC over voltage warning LED
- 120VAC line cross protection
- Battery self-test
- One year warranty

#391-165 **\$37.76** EACH

Triplett WireMaster Cable Tester

- Tests RJ45, RJ11, BNC, 1394, and USB cables
- Simple one button test
- Ergonomic, portable handheld design
- Tests installed wiring or patch cables
- Remote attaches to main unit
- 600 ft. test distance (RJ45 / RJ11 / BNC)
- Built-in battery test
- LEDs indicate connections and faults
- Beeper provides audible annunciation of test results
- Tests shields in 1394 and USB cables
- Tests shielded (STP) or unshielded (UTP) LAN cables
- One year warranty

#391-160 **\$112.46** EACH

Triplett TDR Digital Cable Length Meter

- Low cost cable length meter/TDR
- Built-in tone generator for cable tracing & identification
- Simple operation with automatic distance display
- Internal library of 39 standard cable types
- Suitable for testing all types of communication cables
- One year warranty

The 3271 TDR is a hand-held cable length meter/TDR fault locator. It is designed to measure the length of copper communication cables, and the distance to any faults within. Advanced signal processing techniques enable the identification of open and short circuits, directly indicating the fault distance on an alpha-numeric LCD. Kit includes: Test unit, test leads, and a protective tool-belt holster.

Triplett 9650 Breaker Sniff-It

- Micro processor controlled—reduces false readings
- Fully automatic—no adjustments necessary
- 120/220 VAC transmitter (250 VAC max)
- Audible & visual indication
- Auto power-off battery saver
- UL listed
- Lifetime warranty

Tired of having to turn lights on and off just to find one breaker? The 9650 digital breaker locator is the solution. Simply plug the transmitter into any outlet, then pass the receiving unit in front of the breaker panel—when you see the receiver light up and emit a tone, you have found your breaker. The unit is fully automatic, so no adjustments are necessary, and it is controlled by a unique micro processor that reduces false readings. Uses one 9V battery (not included). The optional adapter kit includes a light socket adapter and an alligator clip adapter.

Part #	Description	Price Each
391-142	Breaker Sniff-It Locator	\$50.09
391-144	Adapter kit	16.82

Velleman Digital Multimeter

velleman

This is one of the best values available in digital multimeters. The 3-1/2 digit LCD display is backlit for easy measurement reading. Other features include: • Touch hold button to capture a stable reading • AC and DC voltage measurements up to 600V • Current up to 10A • Diode and continuity test with buzzer • Resistance measurements to 2M ohms • Transistor hFE test (0-1000). Includes test leads, molded protective case with stand, 9V battery and user manual. Its small size, 5-5/8" H x 2-7/8" W x 1-1/2" D, makes it perfect for the tool box or to have an extra meter at the shop! Model #DVM850BL

6" Precision Digital Caliper

- Priced for the hobbyist
- Professional performance
- Hardened stainless steel construction

This 6" precision digital caliper measures in either inches or millimeters, from 0 to 6" or 0 to 150 mm. A five digit LCD display and zeroing button ensures accuracy, as does the ground lapped measuring surface and epoxy embedded linear scale. Hardened stainless steel construction virtually guarantees a lifetime of performance. Nylon case with form fitting foam insert and replacement battery (AG13 button cell) included. Includes nylon case.
