Rayovac Photo & Electronics Batteries

Never Miss a Moment with Rayovac Photo Batteries!

- Long-lasting quality for less cost
- The dependable Rayovac brand
- Guaranteed performance
- Powerful solutions for film and digital cameras

Life is a series of special moments. Though we can't make them last, photos allow us to relive them again and again. A baby's first steps. Your daughter's high school graduation. Weddings, anniversaries, birthdays, vacations. These times are too special to miss capturing because of a dead camera battery. Keep plenty of Rayovac Photo batteries on hand and never miss another moment. Rayovac photo batteries give long lasting performance through all your clicks, flashes and zooms...and for less cost than other higher-priced brands.

Rayovac NiMH Rechargeable Batteries

- Lasts 3 times longer than standard alkaline in digital cameras
- Can be charged up to 1,000 times
- No "memory" problems—recharges anytime, even if partially drained
- NiMH is safe for the environment and can be disposed of with regular trash

Rayovac's high-capacity NiMH batteries are the perfect power solution for demanding high-drain devices. They last up to three times longer than standard alkaline batteries in digital cameras and can be recharged up to 1,000 times. Today's demanding high-tech devices demand Rayovac rechargeable NiMH!

Rayovac Hybrid™ NiMH Rechargeable Batteries

The Best of Both Worlds: Ready to use like an alkaline; powerful and reusable like a rechargeable!

- Ready to use
- Holds charge longer than 6 months
- Works in ALL chargers
- Saves you money
- Works in all devices
- Lasts longer than alkaline

Hybrid™ technology combines all the powerful benefits of rechargeable batteries with the convenience of disposable alkaline batteries. Like rechargeables, Hybrid™ delivers high performance time and again—saving money and environmental waste. Like disposable alkaline, Hybrid™ comes conveniently ready to use and maintains its charge over time.
