

Velleman SOL5N Trickle Charger with Solar Cells (12V/1.5W)

- Harnesses the power of the sun to keep 12V batteries charged
- Works with car, truck, and motorcycle batteries
- Includes cigarette lighter plug, battery clamps, and four suction cups
- Built-in protection circuit guards against current reversal

Velleman's SOL5N 12 VDC solar cell trickle charger is great for keeping an automotive or motorcycle battery fresh and charged while the vehicle is parked outside. The solar cell produces up to 1-1/2 watts of power, so there is no worry of overcharging and battery damage. A built-in protection circuit guards against current reversal. Included with the solar cell trickle charger is a cigarette lighter plug with lead wires for temporary charging, two battery clamps with lead wires for long term charging, and four suction cups for vehicle window mounting.

Specifications: • Maximum voltage output: 14.5 VDC • Maximum current output: 125 mA • Maximum power output: 1.5 watts • Dimensions: 4.7" H x 13.4" W x 0.6" D.

Panasonic Sealed Lead Acid Batteries

High quality sealed lead acid batteries have many uses including computer UPS systems, alarm back-up, garden tractor starter battery, plus many more. The 12V, 33 Ah (140-475) is ideal for wheelchairs and golf carts. 140-435 thru 140-465 have .187" tab terminations, while the higher capacity 12V batteries, 140-470, 140-475 and 140-478, have nut & bolt terminations. These Panasonic batteries adopt UL94HB compliant resin as the material of the case.

Nickel Cadmium Cells Solder Tabs

These high quality rechargeable Ni-Cad cells from Sanyo feature pre-welded solder tabs, which make them ideal for building odd, hard to find, or custom battery packs. For matching odd sized cells, use the dimensions listed below. Suitable for use with one hour fast-charge battery chargers. Rating: 1.2 volts. Sold individually.

Part #	Fig.	Cell Type	Capacity	Dimensions (Dia. x H)	Price (1-5)	Price (6-UP)
