## SOVTEK®

### Vacuum Tubes

The Sovtek brand of military grade vacuum tubes are made in Russia and are considered to be among the finest available. Matching power tubes for equal current draw is important for maximum performance. Premium Platinum matched octal power and EL84 tubes are burned for 24 hours, then tested by a state-of-the-art computerized testing machine to ensure accurate matching.

### About the Sovtek 6L6WXT

Sovtek is proud to announce the release of their new 6L6WXT+ vacuum tube. Modeled after the vintage RCA 6L6GC "blackplate," the Sovtek 6L6WXT+ features larger plate dimensions and improved grid structure for increased power handling capabilities. The 6L6WXT+ also features mica spacers with metal springs to eliminate tube rattle and microphonics. The Sovtek 6L6WXT+ yields a 20% higher output than the Sovtek 5881WXT and offers superior tone and overall performance to any 6L6 or KT66. The ultimate 6L6, the WXT+ will improve the sound of any 6L6 guitar amplifier.

### About the Sovtek KT88

The Sovtek KT88 was designed to offer the highest output power and the most reliable, linear performance available in a KT88. The unique tri-alloy plate structure of the Sovtek KT88 yields higher minimum plate current and higher transconductance while improving heat dissipation and reducing tube warm-up time. Its triple-carbonate Oxide Cathode allows the Sovtek KT88 to operate at full power for extended time periods without failure. These improved characteristics offer increased power output, higher amplification factors, and more precise tube matching with minimal drift while still maintaining tonal clarity.

Part #	Fig.	Tube Type	Price (1-5)	Price (6-UP)
072-490	T	KT88	\$29.32	\$26.21
072-492	T	KT88 Duet	62.78	57.08
