Subwoofer Kits

Dayton Audio Subwoofer System Kits

- Easily assembled one-hour kits
- House rattling bass
- Exceptional value
- Five-year driver and one-year amplifier warranty
- More bass for your buck

Dayton Audio subwoofers give you the performance you demand, at a price that makes plain common sense. Each system features one of Dayton Audio's exclusive drivers, famous for excellent build quality and awesome low frequency performance. The driver is precisely mated to a high-power amplifier that exploits the woofer's massive potential and provides the best sound quality and highest output levels.

Many of Dayton Audio's subwoofer systems are available as easily assembled kits that require a few basic hand tools and approximately one hour to complete. A subwoofer driver, amplifier, and completely finished custom cabinet are included, along with instructions and all necessary hardware.

If you don't agree your new Dayton Audio subwoofer produces more bass per dollar than any other, you can send it back for a refund of your purchase price!

TITANIC MKIII

Titanic Subwoofer Kits

Each Titanic subwoofer kit features a legendary USA-built Titanic MKIII driver and Dayton Audio amplifier. These premium components are housed in a 3/4" MDF enclosure featuring an internal brace, satin textured enamel finish, and 1" MDF grill. The result is a system that is unobtrusive in appearance but offers truly awesome bass performance.

10" T1003 Subwoofer System Kit

The Dayton Audio 10" Titanic MKIII Subwoofer System is the latest evolution of a design that has received enthusiastic reviews from users and the press for over six years. With its 10" Titanic MKIII driver and SA240 amplifier, the T1003 delivers punchy, accurate bass—exceptional for music playback and great for small-to-medium sized home theater systems. Expect useful bass output down to 30 Hz, and output levels up to 105 dB. Features high and low level inputs, built-in variable crossover, auto on/off, and 240 watts RMS output. External dimensions: 14" W x 14" H x 14-1/4" D.

#300-760 \$549.99 LIST **\$399.80** EACH

12" T1203 Subwoofer System Kit

Dayton Audio's T1203 12" Titanic MKIII Subwoofer System combines power and musicality, and offers excellent all-around performance for serious home theaters or music listening setups. The modestly sized enclosure will fit into most rooms, yet the system's deep and powerful bass will dramatically enhance any application. A powerful HPSA500 500 watt amp and long-excursion Titanic MKIII driver allow this system to achieve in-room SPLs of 110 dB, with output down to 25 Hz. Amplifier features stereo line-level as well as LFE input, variable low-pass crossover, full parametric EQ, and auto on/off. External dimensions: 17" W x 17" H x 17-1/4" D.

#300-762 \$799.99 LIST **\$599.79** EACH

15" T1503 Subwoofer System Kit

The 15" Titanic MKIII Subwoofer System is the Dayton Audio sub of choice for home theater buffs wanting to put their local movie theater's bass to shame. The T1503's imposing 15" Titanic MKIII driver and HPSA1000 1,000-watt amplifier enable this system to move enough air to create a truly visceral experience—explosions are felt as well as heard. You will not find a subwoofer with deeper or more powerful bass than the T1503 for less than \$1,000.00, period. Amplifier features stereo line-level as well as LFE input, variable low-pass crossover, full parametric EQ, and auto on/off. Exterior dimensions: 19-1/8" W x 19-1/8" H x 19-3/8" D.

#300-764 \$999.99 LIST **\$749.85** EACH

Also available as plug-and-play finished systems. See page 13 for details.

RS1200 Reference Series 12" Subwoofer System Kit

Do-it-yourself and get more bass for less money!

- One-hour kit—easy to assemble
- High quality subwoofer system for music or home theater
- Dayton Reference Series legendary ultra-low-distortion subwoofer
- Adjustable volume, crossover frequency, bandwidth and more
- Clean, detailed bass down to 25 Hz
- Performance that rivals popular systems costing much, much more

Dayton Reference Series loudspeakers have gained an enormous following and respect among speaker builders and audiophiles. After listening to an RS1200 subwoofer system, it's easy to hear why! The system is built around the popular and powerful 12" RSS315HF-4 subwoofer, combined with the Dayton HPSA500 subwoofer amplifier—one of the most technologically advanced sub amps available.

Even in the most demanding application, this designed and engineered in the U.S.A. system delivers high-excursion sub-bass uncolored by extraneous resonances or mechanical noise. Dayton Audio's low-distortion Reference Series driver produces deep, musical low frequency output with maximum fidelity, even when called upon to recreate the explosive dynamics demanded by realistic home theater playback. The 500 watt onboard amplifier provides the horsepower needed for optimum performance in any room environment.

Specifications: • 12" subwoofer • 500 watt amplifier • Frequency range: 25-180 Hz • Adjustable 40 - 180 Hz low-pass filter • LFE and line-level inputs • Auto-on • Dimensions: 17" H x 17" W x 17-1/4" D.

#300-742 \$749.99 LIST **\$549.93** EACH

Also available as a finished system. See page 17 for details.

C1500 15" Subwoofer System Kit

- Custom matched cabinet, amp, and driver for maximum performance
- Awesome theater level, chest pounding bass down to 25 Hz
- Fast and easy assembly—go from unpacking to playing in no time!

When it comes to bass output, it's all about moving air—and there's no better way to do that than with a 15" driver! With its powerful

240 watt amp, high-excursion 15" driver, and rigid cabinet, you will not be able to find a better quality, higher performance subwoofer anywhere else at this price. The attractive black ash finished MDF cabinet comes with grill and all hardware pre-installed, so all you have to do is secure the driver and amp and you are ready to rumble. If you've never built a kit before, this is your chance to see how Dayton Audio makes it easy to save money and achieve exceptional results.

Specifications: • 15" long-throw subwoofer driver • 240 watt amplifier • Frequency range: 25-180 Hz • Adjustable 40-180 Hz low-pass filter • Line-level and speaker-level inputs • Auto-on • Dimensions: 18-3/4" H x 18" W x 19" D.
