

Eminence Legend Guitar Loudspeakers

Eminence guitar legends are specially designed for electric guitar amplifiers. Tuned by skilled ears, these hand-built specials feature a range of materials and ideas from over 30 years of experience. The Legend B15 and Legend 121 (for bass and lead respectively) are state of the art designs which meet the modern day demand for power handling. Other models feature vintage magnet and cone materials to recreate the traditional sound of lead and jazz guitar.

Part #	Model #	Size	RMS Power Handling	Impedance	Frequency Response	SPL (1W/1m)	Magnet Weight	List Price	Price Each
290-473	Legend 1028K	10"	35 Watts	8 ohms	100-5,500 Hz	97.4	6 oz. Alnico	\$84.99	\$79.97
Eminence has been producing this Alnico for some of the world's finest amplifier manufacturers for years. Featuring a Kapton former, black frame, and 6 oz. Alnico magnet, this classic lends that warm blues tone that has helped in making many of its users legendary.									
290-495	Legend B102	10"	200 Watts	8 ohms	44-4,000 Hz	93 dB	45 oz.	99.99	89.97
Our best all purpose, broad bandwidth, bass guitar speaker. This unit exhibits lots of punch and is great for Pop and Slap Bass, Jazz and Rock'n'Roll. This cast frame speaker is the ideal replacement or upgrade for many bass players.									
290-470	Legend BP102-4	10"	200 Watts	4 ohms	40-2,000 Hz	92 dB	38 oz.	79.99	74.97
290-471	Legend BP102	10"	200 Watts	8 ohms	40-2,000 Hz	92 dB	38 oz.	79.99	60.00
The Legend BP102 has been a staple product for many bass guitar wonders over the past 10 years. This is a favorite for 3x, 4x, and 8x10 cabinets! Don't let the sensitivity fool you, this speaker will really punch out the bass with authority. It also works great as a mid in PA applications or in a three-way bass cabinet.									
290-476	Legend 1058	10"	75 Watts	8 ohms	100-6,000 Hz	98.7 dB	16 oz.	54.99	49.97
290-478	Legend 10516	10"	75 Watts	16 ohms	100-5,800 Hz	100 dB	16 oz.	54.99	49.97
When you need a little extra power, this model is perfect as a general replacement. It has been and continues to be original equipment in many of your favorites. Lots of punch and crunch!									
290-488	Legend GB128	12"	50 Watts	8 ohms	80-5,100 Hz	101.4 dB	38 oz.	74.99	69.97
A classic British sound. Our British friends are renowned for producing some of the world's finest guitar speaker cones. In the GB12, a British cone with Eminence technology yields super cool definition with lots of punch: tonal characteristics embraced by some of our most legendary guitar players. A warm low end makes this driver ideal for Blues as well as classic Rock'n'Roll.									
290-490	Legend V128	12"	120 Watts	8 ohms	80-5,000 Hz	100.9 dB	38 oz.	74.99	69.97
Surely a favorite! The V12 exhibits very tight definition along with lots of volume and rich, tonal harmonic balance. A British manufactured cone lends characteristics that are suitable for many styles but particularly enjoyed by many rock guitarists.									
290-486	Legend 1258	12"	75 Watts	8 ohms	80-4,000 Hz	100.1 dB	34 oz.	69.99	64.97
Pure Vintage! Used in re-issues of some of your favorites. Nice smooth response curve. Superb classic Blues tones. For use as a replacement or upgrade.									
290-480	Legend 1218	12"	150 Watts	8 ohms	80-4,200 Hz	98.8 dB	38 oz.	89.99	84.97
High power handling capability. Warm, rich low end, smooth mids and very loud. Great replacement or upgrade.									
290-496	Legend 1518	15"	150 Watts	8 ohms	60-4,000 Hz	102.2 dB	59 oz.	84.99	79.97
Excellent for use in combos, lending a tremendous raw bottom end and reproducing those tight slapping mids.									
290-497	Legend CB15	15"	300 Watts	8 ohms	47-3,000 Hz	98 dB	80 oz.	124.99	119.97
With a cast aluminum frame, 2-1/2" voice coil and 300 watts of power-handling, this speaker is the best choice for the serious player! Many bassists have historically chosen 10" speakers in their rigs for their distinctive tonal characteristics, but more often because they allow a much lighter and smaller cabinet. There is, however, no substitute for a larger format woofer when you are trying to produce bass. The CB15 provides the best of both worlds by punching out low-end that only a 15" woofer can provide, but doing it in a smaller enclosure.									

Eminence Acoustinator™ Acoustic Guitar Speakers

CX2008 8" Coaxial Poly Cone Speaker

Recommended for full-range acoustic instruments in both sealed and vented enclosures. Coaxial design for optional extended HF (APT 50 HF driver sold separately.) Features a pressed steel basket, polypropylene cone with rubber cone edge, and Zurette dust cap.

Specifications: • Power handling: 200 watts RMS • V_{CDIA}: 2" • Impedance: 8 ohms • Frequency Range: 60-3,500 Hz • Sensitivity: 90.8 dB 1W/1m • Magnet weight: 38 oz. • Dimensions: Overall Diameter: 8.24", Cutout Diameter: 7.13", Mounting Depth: 3.6".

#290-890 \$69.99 LIST **\$64.97** EACH

NH2008 8" Hemp Cone Neo Speaker

Recommended for acoustic instrument applications in both sealed and vented enclosures. The Hemp Cone™ lends a very "woody" tone. Features a neodymium magnet structure, Santoprene cone edge, and solid composition felt dust cap.

Specifications: • Power handling: 150 watts RMS • V_{CDIA}: 2" • Impedance: 8 ohms • Frequency Range: 60-3,300 Hz • Sensitivity: 94.5 dB 1W/1m • Magnet weight: 4 oz. • Dimensions: Overall Diameter: 8.24", Cutout Diameter: 7.13", Mounting Depth: 3.6".

#290-892 \$84.99 LIST **\$79.97** EACH

N2012 12" Poly Cone Neo Speaker

Recommended for acoustic instrument applications in both sealed and vented enclosures where a lightweight speaker would be beneficial. Features a neodymium magnet structure, polypropylene cone with Santoprene cone edge, and solid composition felt dust cap.

Specifications: • Power handling: 150 watts RMS • V_{CDIA}: 2" • Impedance: 8 ohms • Frequency Range: 40-3,500 Hz • Sensitivity: 94.7 dB 1W/1m • Magnet weight: 7 oz. • Dimensions: Overall Diameter: 12.26", Cutout Diameter: 11", Mounting Depth: 5.1".

#290-894 \$99.99 LIST **\$94.97** EACH
