

## FM Stereo Modulator

- Add video sound to your factory sound system
- Easy installation

Add "Home Theater" sound to your mobile video system with this FM modulator. It modulates line level audio (stereo) from a VCR, DVD, automotive TV tuner or any audio source to an FM frequency so you can receive the signal on your factory radio sound system. Also great for listening to a portable CD or MP3 player in your car. Switchable output frequency: 88.7 MHz or 89.1 MHz. Easy hook-up—simply connects inline with your AM/FM antenna. Operates on 12 VDC, 40mA. Uses RCA type connectors on audio input.

#205-215 ..... \$69.99 LIST **\$38.90** (1-3) **\$35.50** (4-UP)

## Pyle 1-In 4-Out Mobile Video Signal Distribution Amplifier

**PYLE**

One input, four output video signal distribution amplifier features independently adjustable variable level controls, one gold-plated RCA video input jack, and four gold-plated RCA video output jacks.
