### StreetWires ZeroNoise® 5 Interconnects

The good interconnect choice to enhance the clarity and dynamics from your mobile audio system!

- Twisted pair design
- Ultra Flex dual jacket
- OFC conductors
- Phase Flow® H.D. PE insulation
- Split-pin center contact
- Sure Grip molded body

### StreetWires ZeroNoise® 7 Interconnects

The better interconnect choice to enhance clarity, dynamics, harmonic structure and tonality from your mobile audio system!

- Hyper Twist® twisted pair design
- Crystalflex® jacket
- UltraGrain® OFC conductors
- Phase Flow® H.D. PE insulation
- Split-pin center contact
- Ultra-grip machined body

### StreetWires ZeroNoise® 9 Interconnects

The best interconnect for clarity, dynamics, harmonic structure and tonality while maximizing sound stage, depth, and imaging from your mobile audio system!

- Hyper Twist® twisted pair design
- Crystalflex® jacket
- Silver-plated UltraGrain® OFC conductors
- PhasePerfect® Teflon® insulation
- Dual split-pin center contact
- Serpentine Cut® machined connector

### StreetWires ZeroNoise® 7 Video Interconnects

- True75™ ohm coaxial construction
- PhaseFlow® L.D. PE insulation
- OFC braided outer conductor
- Split-pin center contact

- Ultra Flex clear coated jacket
- Precision machined connector with Sure Grip machined body

ZN7V video interconnects are engineered to deliver the "Best" possible video reproduction specifically within the automotive environment. This is achieved by maintaining the proper True75™ ohm cable geometry during the physical installation. This significantly optimizes the video signal transfer to maximize color, contrast and brightness while allowing for a sharper resolution, and enhanced detail. Additionally, the ZNV cable provides excellent radio frequency interference shielding, which is mandatory when transferring ultra wide bandwidth video signals within the automobile.

### StreetWires ZeroNoise® ZN5AV Audio/Video Interconnects

- Split-pin center contact
- Ultra Flex clear coated jacket
- Sure Grip molded body
- Phase Flow® H.D. PE insulation

ZN5AV audio/video interconnects are engineered with several technologies and materials used in both the ZN7 and ZN7V video interconnects. The combination of the ZN7 and ZN7V interconnect cables enhances the clarity and dynamics of the audio and optimizes the video signal transfer to maximize color, contrast, brightness, sharper resolution, and enhanced detail in one convenient package. **#263-384** (ZN5AV35 - 3.5m/11.5 ft.) . . . . . \$54.99 LIST **\$43.89** EACH

### StreetWires Super Cable® Speaker Wire

- Fine-stranded, high conductivity copper windings
- Translucent blue Ultra-Flex jacketing
- Low profile parallel design for easy installations
- Zero-grip insulation for smooth installations

Over the past 23 years, StreetWires has perfected the craftsmanship, quality, and performance of their speaker cables. Super Cable® is the only cable that, in addition to continuous visual polarity markings, features two different ways to verify polarity: The smooth negative jacket, and the ribbed positive jacket. StreetWires Super Cable® represents the advancement of speaker cable design. Sold on 50 ft. spool.

- #100-940** (16 AWG-SCP1650BL) . . . . . \$29.99 LIST **\$23.89** EACH
- #100-942** (14 AWG-SCP1450BL) . . . . . \$44.99 LIST **\$35.89** EACH

### StreetWires ZN RCA Interconnect Adapters

The engineers at StreetWires designed these RCA ZN interconnect adapters with convenience and ease of installation in mind. Each connector allows you to reconfigure the gender of signal cables thus providing a quick and easy fix for any system in need of longer cables or correct connectors. Sold in pairs (ZNADPYM2F sold individually).
