## Mobile Video

### 6" TFT-LCD Video Module with Mounting Brackets

- Attached low profile mounting tabs
- Easy to install for a custom fit and finish
- Auto turn-on when a video signal is present

**Specifications:** • Screen resolution: 960 H x 234 V  
• Screen format: 4:3 • Video system: NTSC only • Operating voltage: DC 9-24V • Power consumption: 1A • Picture controls: Brightness & Color • Monitor dimensions (mm): 146 H x 113 W x 22 D.

**#205-048** ..... \$245.99 LIST **\$168.00** (1-3) **\$162.00** (4-UP)  
**#205-052** (Optional Visor Shroud) ..... \$19.99 LIST **\$7.88** (1-3) **\$6.98** (4-UP)

### Multi-Source Audio/Video Selector with Wired Remote Control

This selector switch is the perfect addition to your mobile video system. No more disconnecting and reconnecting when wanting to use different A/V sources. Allows the selection of up to four audio/video sources such as DVD, VCR, and video games. Selection is done via a 10 ft. wired remote control. Outputs are one pair of audio (stereo) and three video outputs for systems with more than one monitor. Unit turns on when signal is detected and shuts off after 120 seconds of no signal. LED indicates power on. Comes with DC voltage plug-in leads for easy connection and plug-in leads for the switched output. Slim design allows for mounting in small out of the way areas. Dimensions: 1" H x 7-1/2" W x 4-5/16" D. Power: DC In: 10-30V; DC Out: 10-30V (dependent on DC In). Video Bandwidth: 10 MHz. Audio bandwidth: 15 kHz. Power consumption: 2.5W max. DC output: 3A max.

**#205-120** ..... \$179.99 LIST **\$108.50** (1-3) **\$99.80** (4-UP)

### Mobile Wireless FM Stereo Modulator

- Two selectable channels
- Designed for mobile video
- Low profile design
- Runs on 12 volts or AAA batteries

This high quality Wireless FM modulator takes OEM integration another level. There simply is not an easier way to add audio from your video source to your existing car radio. The Wireless technology eliminates the need to remove the car radio to transmit the audio to the FM band. You simply hook the audio output of your video source directly to the unit via a 3.5 mm to RCA cable (supplied), add power and you are finished.

**Specifications:** • Input power: 12 VDC or two AAA batteries • Transmitting frequencies: 88.7 and 89.1 • Dimensions: 1.15" H x 3" W x 4.125" D.

**#205-220** ..... \$49.99 LIST **\$29.70** (1-3) **\$27.85** (4-UP)

### FM Stereo Modulator

- Add video sound to your factory sound system
- Easy installation

This FM modulator makes it easy to add "Home Theater" sound to your mobile video system. It modulates line level audio (stereo) from a VCR, DVD, automotive TV tuner or any audio source to an FM frequency so you can receive the signal on your factory radio sound system. Also great for listening to a portable CD or MP3 player in your car. Switchable output frequency: 88.7 MHz or 89.1 MHz. Easy hook-up—simply connects inline with your AM/FM antenna. Operates on 12 VDC, 40mA. Uses RCA type connectors on audio input.

**#205-215** ..... \$69.99 LIST **\$38.90** (1-3) **\$35.50** (4-UP)

### Pyle Wireless IR Stereo Headphones

Lightweight headphones for use with Pyle video systems that include a built-in wireless IR transmitter function. Features on/off switch, mono/stereo switch, and volume control. Operates up to 48 hours on two AAA batteries (sold separately). Mfg. # PLVWH5.

**#205-562** ..... \$64.80 LIST **\$21.50** EACH

### Pyle Wireless IR Stereo Headphones

Two lightweight wireless stereo headphones with IR transmitter, or use with Pyle video systems that include the built-in wireless IR transmitter function. Features on/off switch, mono/stereo switch, and volume control. Operates up to 48 hours on two AAA batteries (sold separately). Carrier frequency: Right channel 2.8 MHz, Left channel: 2.3 MHz. Mfg. #PLVWH6.

**#205-564** ..... \$138.69 LIST **\$53.80** EACH

### Audiovox Wireless Infrared Headset

- Auto shutoff
- Adjustable headband
- Adjustable volume control

Wireless infrared headphone eliminates the annoying wires that can get in the way of a driver's line of site and also clutter up the back seat area. These headphones are designed for the automotive environment by providing excellent comfort for long trips. Works with all Audiovox Drop Down Monitors with IR capability. Requires 2 AAA batteries (sold separately). Three year warranty. Mfg. #MVRHS.

**#205-730** ..... \$49.90 LIST **\$29.75** EACH

### Wireless FM Headphones With Variable Tuner

These high quality wireless FM headphones are an excellent choice for mobile video when used with our #205-220 Wireless FM Transmitter. They can also work as stand-alone FM headphones for private FM listening. They feature a volume control, power switch, and FM frequency tuner from 88 to 108 MHz. Two AAA batteries included.

**#205-222** ..... \$23.75 (1-3) **\$19.65** (4-UP)

### Wireless RF Headphone System

- Ideal for mobile video
- Transmits on the VHF Band
- Clear audio play back
- No "Line of Sight" needed for operation
- Volume control on headphone

Eliminate those cumbersome headphone wires by utilizing this RF Headphone System. By connecting the output of your mobile video system, you can enjoy wireless crystal clear audio for one or more passengers. This system can be used anywhere that may benefit from having the convenience of wireless headphones.

**Specifications:** • 12 VDC • 3.5 mm to stereo RCA cable supplied • 50 ft. operating range • Transmitter dimensions: 1" H x 3.125" W x 4" D • AC/DC adapter included.
