24-key Infrared Controller
For LED Light Strip
Control Method
Simple instruction of using the upgraded keyboard:
1. Connect the RGB LED Strip and IR controller. Power the controller and then press the button “ON”
2. Press one of the three buttons---- “R”, "G" or "B", the LED strip will be illuminated in corresponding color.
3. If step 2 doesn’t work, press the button “OFF” and then press the button “SMOOTH”. Next, press the button “ON”. Repeat step 2, and then the LED strip will be illuminated in corresponding color.
4. If color is still not correct, repeat step 3 and step 2.
5. Repeat the above steps, and finally the LED strip will be illuminated in right color you want.
